Nebraska Rural Health Works Health Economic Profile for Buffalo County, Nebraska

Prepared by
Li-Wu Chen, Ph.D., Project Director
Michelle Mason, M.A., Health Data Analyst
Liyan Xu, M.S., Health Data Analyst
Celeste Pierce, Project Assistant

May 2009

Executive Summary on the Economic Impact of the Health Care Sector

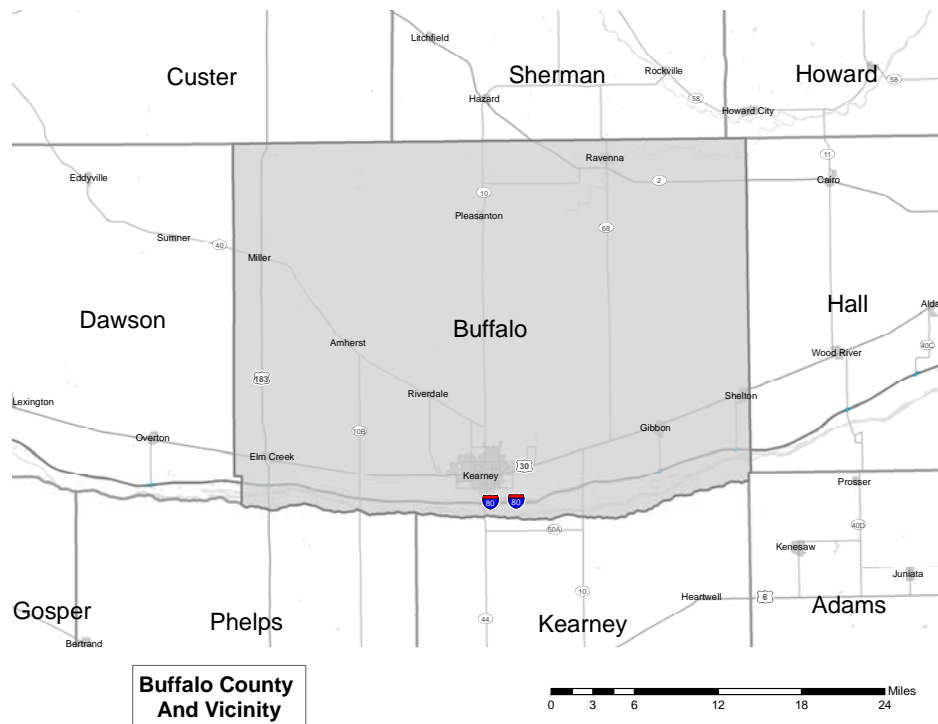

- ◆ One job created in the health care sector of Buffalo County would lead to the creation of another 0.62 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Buffalo County would lead to another \$0.32 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Buffalo County would lead to another \$0.53 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Buffalo County is estimated at 5,526 jobs, which accounts for 16.5% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Buffalo County is estimated at \$220 million, which accounts for 20.1% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Buffalo County is estimated at \$487 million, which accounts for 13.2% of the county's total economic output.

I. GEOGRAPHY

Buffalo County is located in the South central region of Nebraska. The county has a total of 967.99 square miles with a population density of 43.7 people per square mile (Nebraska: 22.3 per square mile). The county seat of Buffalo County is Kearney, Nebraska.

Buffalo County, Nebraska

II. POPULATION

The population for Buffalo County was 44,009 in 2006. The county experienced a positive population change of 17.5% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The white population represented the majority of county's population in 2006 (97.5% vs. 91.8% statewide, Table 1). In addition, the county's population is younger than the state's, with the elderly (aged 65+) representing 11.8% (compared to 13.9% statewide) of the population in 2006 (Table 2).

III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Manufacturing is the largest employer within Buffalo County, followed by health care and social assistance, retail trade, accommodation and food services, and other services. The health care sector of Buffalo County includes two hospitals, seventeen nursing care facilities, eighty-eight offices of dentists, physicians and other health professionals, eight other ambulatory health care services, and twelve pharmacies.

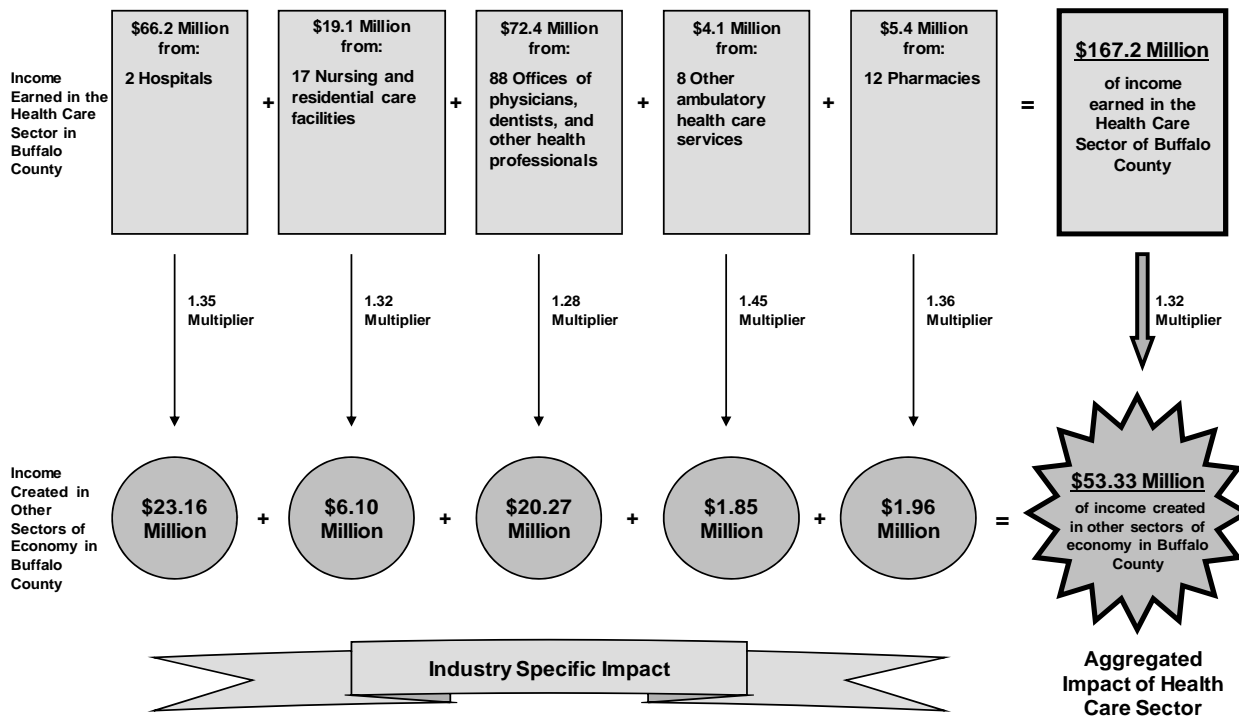

- ◆ The 3,419 jobs in the health care sector of Buffalo County created (through a 1.62 multiplier) another 2,107 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 16.5% of the county's total employment (i.e., 5,526 out of 33,413 jobs).
- ◆ The \$167.2 million of income earned in the health care sector of Buffalo County has created (through a 1.32 multiplier) another \$53.3 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 20.1% of the county's total income (i.e., \$220.5 million out of \$1.1 billion).
- ◆ The \$318.4 million spent in the health care sector of Buffalo County created (through a 1.53 multiplier) another \$168.7 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 13.2% of the county's total economic output (i.e., \$487.2 million out of \$3.7 billion).

IV. SOCIO-ECONOMIC INDICATORS

The median household income of the county increased since 2000 by 10.4% to \$41,036 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 39.2%, to \$28,817 in 2005 (compared to \$32,923 statewide) (Figure 5). Buffalo County experienced a slightly lower unemployment rate than the state in 2006 (2.2% vs. 3.0% statewide) and a slightly higher poverty rate than the state in 2004 (10.6% vs. 10.0% statewide) (Figure 6). The county outperformed the state in all four social indicators shown in Table 3.

Table 3. Selected Social Indicators for Buffalo County and Nebraska

	Buffalo County	Nebraska
Percent of residents aged 25 and older who did not graduate from high school (2000)	10.8%	13.4%
Percent of 7-12th graders who dropped out of school (2003-2004)	0.7%	1.9%
Percent of first births born to unmarried women, younger than 20, with less than a high school education (2000-2004)	6.5%	9.0%
Crime arrest rate per 1,000 population (2004)	52.5	54.2

V. HEALTH STATUS INDICATORS

Buffalo County had a lower unintentional injury death rate and overall death rate compared with the state between 2000 and 2004 (Figure 7). Buffalo County out-performed the state in all four selected maternal and child health indicators with a lower low-weight birth rate, a lower percentage of births to adolescents aged 10-17, a lower percentage of pregnant women who smoke, and a higher percentage of pregnant women who reported obtaining prenatal care in the 1st trimester (Figure 8). Among the top 5 leading causes of death of Buffalo County residents, the county had a higher rate of death due to cerebrovascular disease than the state (Figure 9). Among the top 5 leading causes of hospitalization of Buffalo County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for all injuries, heart disease, and musculoskeletal disease (Figure 10).

Figure 10. Top 5 Leading Causes of Hospitalization* for Buffalo County and the Corresponding Hospitalization Rates for the County and Nebraska, 2003-2004**

*Hospitalizations for pregnancy and childbirth were excluded from this analysis.

**Defined as the proportion of inpatient hospital discharges to a population within clearly specified geographic boundaries, age adjusted per 100,000 population.
 Source: Nebraska Health and Human Services County Profiles. <http://www.hhs.state.ne.us/profiles/index.htm#County>.

VI. HEALTH CARE PROFESSIONALS

Buffalo County is federally designated as a mental health professional shortage area. The state government has designated Buffalo County as a health professional shortage area in the specialties of general surgery, internal medicine, and mental health. Buffalo County has a lower professional-to-population than the state for pharmacists and EMS professionals and a higher professional-to-population ratio than the state for the other health professional areas shown in Figure 11.

Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Buffalo County and Nebraska, 2005

*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.

** Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.

VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Buffalo County has a slightly higher bed-to-population ratio than the state. As a result, the need for hospital inpatient care (for the general public) should be met within the county.

Table 4. Selected Health Care Facility Bed-to-Population Ratios for Buffalo County and Nebraska

	Buffalo County	Nebraska
Number of hospital beds per 1,000 population (2007)	3.75**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	80.6*	73.9*

Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. (liwuchen@unmc.edu), or Michelle Mason, M.A. (mmason@unmc.edu) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
